Introduction:

The Oncopathology Conference 2025 Organised by Triesta Sciences - HCG, invites you to a two-day event dedicated to the cutting-edge advancements in Oncopathology. Join us on **8th & 9th March 2025** at **La Marvella, South End Circle, Bengaluru, India**, to explore the integration of morphological and molecular diagnostics in improving accuracy in line with latest guidelines. This conference will provide a comprehensive platform for professionals to discuss the latest developments, challenges, and future directions in the Oncopathology field.

With an exciting lineup of expert-led scientific sessions Case Presentations and multidisciplinary talks, the event will cover multiple key areas **in Oncopathology practice, and precision oncology**. It will also explore how morphology and molecular diagnostics are shaping current and the future of medical diagnostics and treatment strategies.

Key Themes & Focus Areas:

- **Breast and FGT Pathology**
Molecular characterization
in treatment planning
- **Urogenital Pathology**
Case-based diagnosis of
kidney and bladder tumors
- **Digital Pathology**
The impact of AI and spatial omics
- **Precision Oncology**
Tailoring cancer therapies
- **Soft Tissue, GI and Head & Neck Tumors**
Molecular diagnostics in complex
tumor management

Applied for KMC Credit points

Why Attend?

Expert Speakers

Learn from renowned experts in the field of Onco pathology from around the globe, reputed Oncopathology centres in India and abroad.

Networking Opportunities

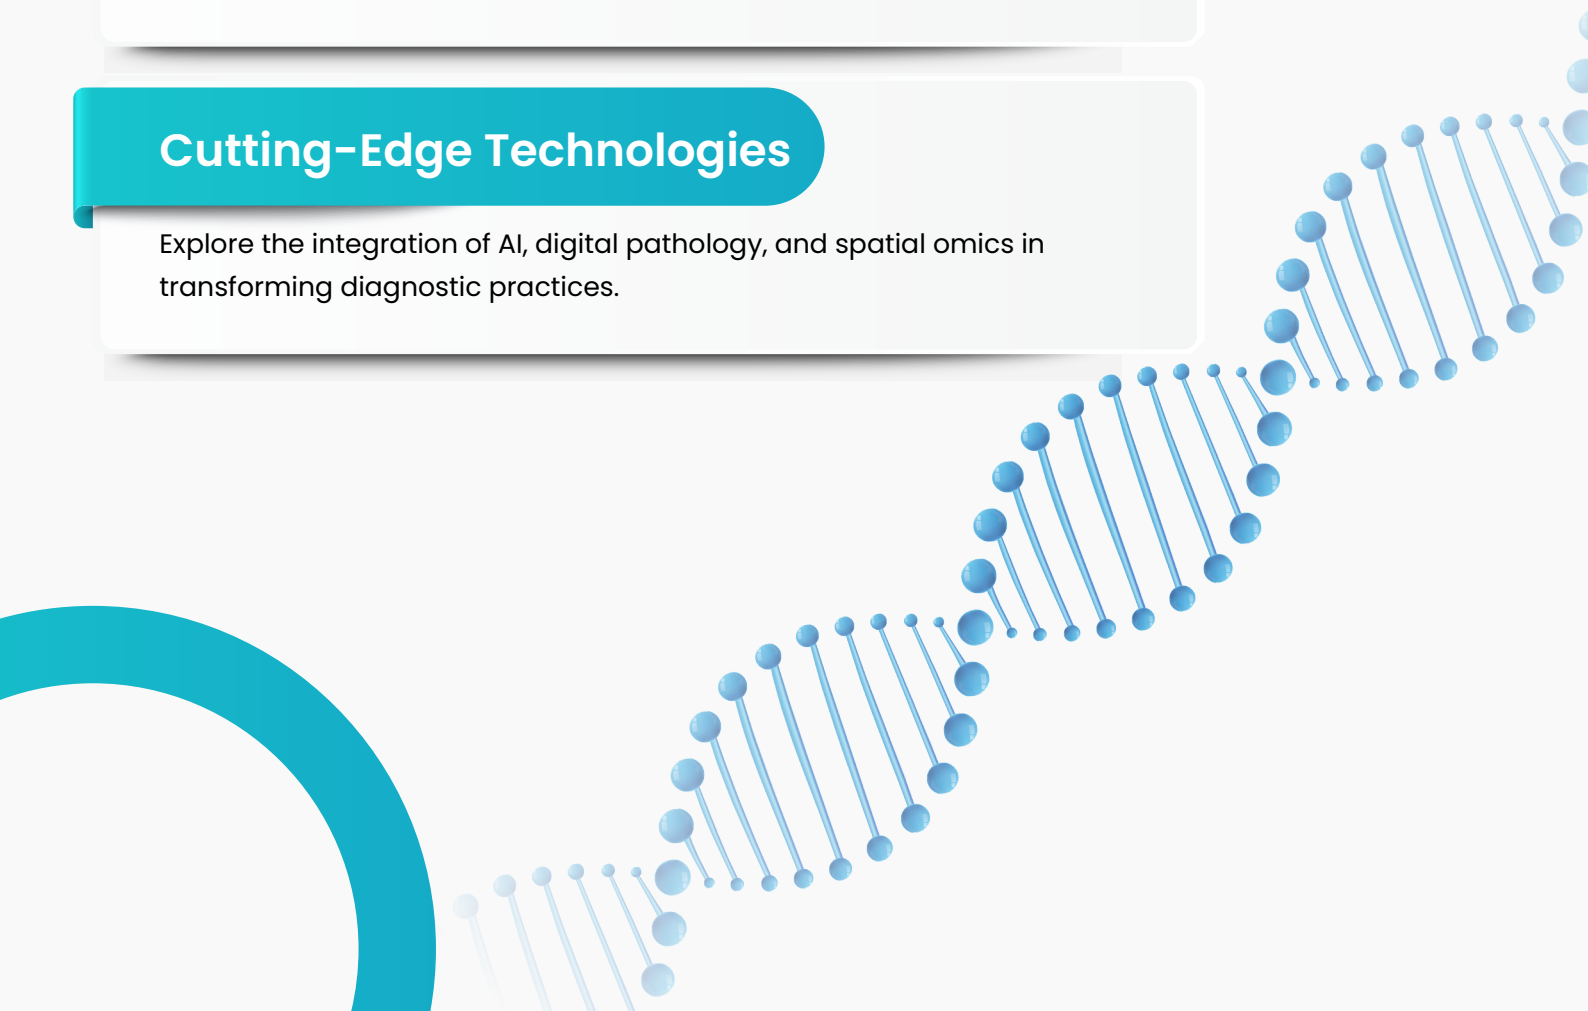

Connect with top professionals, researchers, and organizations from the pathology community.

Interactive Sessions

Engage in panel discussions, case studies, and multidisciplinary talks that bridge the gap between clinical and Pathology practices.

Cutting-Edge Technologies

Explore the integration of AI, digital pathology, and spatial omics in transforming diagnostic practices.
